## Technical Information

Feature: Wall Mount, Widespread, Waterfall  
 Style: Contemporary  
 Installation Holes: Two Holes  
 Number of Handle: Single Handle  
 Spout Length: 7.48 " (190 mm)  
 Spout Width: 4.6 " (118 mm)  
 Faucet Center: 3 to 6 Inches  
 Valve Type: Ceramic Valve  
 Faucet Body Material: Brass  
 Faucet Spout Material: Brass  
 Faucet Handle Material: Zinc Alloy  
 Flow Rate: Max 4 GPM / 15.1 LPM (tub Spout)

## Installation Instruction

Before installing your new mixer, flush through the pipework to ensure the removal of debris, turn off the water supply.

The valve must be set into the wall.

Mark a horizontal line on the wall at the required height, mark the position of the valve and the spout, drill the holes.

Mark the position of the valve and drill 2 holes to take suitable wall plugs and screws.

Connect the water supply to the inlet pipes. The hot water should be connected to the left-hand tap.

Screw the cover plate over the valve and up to the wall, push the 'O' ring onto the splines, push on the control handle in a horizontal position and fix in place using the hexagonal key.

Screw on the spout up to the wall.

1. Fix the valve body into the wall with screws. Make sure the valve body is completely level.
2. Connect the hot and cold water inlets of the valve body to the main water supply.

## Care & Cleaning

1. The product can be cleaned with warm water, a mild soap and a clean soft cloth.
2. Clean progressively and gently.
3. It is not required to use any abrasive cleaning pads, wire wool or micro-fibre cloths to clean the product.
4. Avoid a vigorous cleaning action, as this could contribute to denaturing and dulling the finish.
5. Abrasive or strong cleaning products containing ammonia, bleaches, alcohol, dyes, acids (hydrochloric, formic, phosphorus, chlorine or acetic) will be detrimental to the product finish.
6. If using a spray cleaner, apply the cleaning agent onto a soft cloth, never directly spray onto the product as the cleaner may enter gaps and openings and cause damage. Do not allow the cleaner to remain on the product for a period of time. After cleaning, rinse thoroughly with clean water.

## Flexible Connecting Hose

Care must be taken when connecting the flexible connection hose from the power supply box to the spout to ensure it does not bend sharply and kink or twist. See above for recommended ways to fit the flexible connecting hose.

Important: Failure to follow these guidelines may result in poor performance and damage to the flexible connection hose.
